

ANSI/ASSP Z359.11-2014 APPROVED

Safety Requirements for ANSI/ASSP Z359.11-2014 approval-Full Body Harnesses

This standard establishes requirements for the performance, design, marking, qualification, instruction, training, test methods, inspection, use, maintenance and removal from service of full body harnesses (FBH). FBHs are used for fall arrest, positioning, travel restraint, suspension and/or rescue applications for users within the capacity range of 130 to 310 pounds (59 to 140 kg).

Item Details:

ANSI/ASSP Z359.11-2014 Safety Requirements for Full Body Harnesses

This standard applies to full body harnesses (FBHs) used in occupations requiring personal protection against falls from heights and if required, shall allow for the specialized functions of travel restraint, positioning, suspension and/or rescue. This standard applies only to FBHs and auxiliary equipment designed specifically for use as part of the FBH. This standard is intended to be used by the manufacturers, distributors, purchasers and users of FBHs, as well as testing, certifying and regulating bodies. Before any FBH shall bear the marking ANSI Z359.11, or be represented in any way as being in compliance with this standard, all applicable requirements of this standard shall be met. FBHs which meet this standard are intended to be used with other components of a system that limits maximum arrest force to 1,800 pounds (8 kN) or less.
